

Universal Testing Machine to determine properties of tensile and elongation as per ASTM D 638/ D 882, flexural as per ASTM D - 790 and compression as per ASTM D 695 of unreinforced and reinforced plastics.

Computerised Twin Screw Dual Channel Universal Testing Machine Embedded touch screen version.
The equipment could also be used to conduct peel, bond and friction test by attaching different fixtures (optional).

Specification:

Load capacity: up to 1000 kg*.

No. of load cell: Two.

Cross Travel: up to 1000 mm*.

Horizontal day light: 450 mm*.

Speed: 2mm / minute to 500mm/minute.

Paint: Powder coated.

Power: 230 Volts, 50Hz, single phase.

* Equipment with other capacities could also be supplied as per the requirement.

Polyfilm Grips

Yarn Grips

Wire Grips
